New Product

Hi there,

Imagine using AI-driven insights to streamline your operations and empower your existing team without the heavy investment, complexity, and compliance fears that come with building and maintaining your own AI model.

That dream is now a reality — thanks to Amount's brand new **AI Policy Optimizer**.

It surfaces insights and bespoke recommendations tailored to each applicant's data, instead of broad market data. The result?

- Faster fraud detection and anomaly identification
- Optimized pricing based individual risk profiles
- Credit policy recommendations that boost conversions and manage risk
- Employees who feel empowered, not replaced

Catch the AI Policy Optimizer's grand debut at Money 20/20. Join us for a video demo at **Booth 3607** — and be sure to book some 1:1 time with our experts to jumpstart the AI conversation.
